

**Northwest Hydraulic
Consultants Ltd.**
is pleased to welcome
Dr. N. (Raj) Rajaratnam
P.Eng.
as a senior
engineering specialist and
technical advisor.

Raj is an award-winning researcher, professor and engineer. He has over 55 years of experience in hydraulic engineering and fluid mechanics and has been a highly-respected faculty member at the University of Alberta within the Water Resources Engineering Department for the last 50 years. He brings with him extensive knowledge in the fields of hydraulic structures, energy dissipation and turbulent jets. He has published over 200 journal papers and has received numerous awards for his research.

Raj joining NHC's Edmonton team provides a meaningful addition to all areas of NHC's business and a significant enhancement to the hydraulic structures design and physical modelling departments. As NHC Edmonton's Branch Manager, Gary Van Der Vinne says, "We are very excited to have Raj join our team; his insight into hydraulic issues will help us to provide even better solutions for our clients."
